MFMA CERTIFICATION

For many years, the Maple Floor Manufacturers Association (MFMA) has had a program of evaluating water and solvent based coatings for use on residential, commercial, and sports hardwood floors. To be certified by MFMA several performance tests must be met. These tests are conducted by independent outside firms according to very specific test protocols.

Maple Flooring Manufacturers Association has published specifications for gymnasium sealers and finishes for maple floors and lists products that conform to such specifications for the sole purpose of providing guidance to achieving the highest protection and most enduring beauty in wood floors. The MFMA logo can be found on the product label as well as the catalog sheet.

Buckeye products can be found under the following categories on the Maple Floor Manufacturers Association website: maplefloor.org.

Group 1 – Sealers: (This group shall include all materials of lower solid's content and viscosity that will also provide adequate surface penetration and slight surface build.)

Buckeye Products listed under Group 1: **Coliseum 100**

Group 3 – Oil Based Surface Finishes: (These materials shall possess a higher solid's content and viscosity that will provide little penetration and good surface build.)

Buckeye Products listed under Group 3: **Coliseum 350 and Coliseum 450**

Group 5 – Water Based Finishes: (These products have no significant amount of solvent within their chemical composition. These products must meet additional specific requirements that are not applicable to groups 1 through 4.

Buckeye Products listed under Group 5: **Arena 200 and Arena 300**
